### **Topic of lecture for the students**

---

**The social economy in axiological/cultural perspective**

### **Outline of lecture for the students**

---

The main objective of the seminar/lecture is to answer the questions as to whether the social economy view of the world is connected with relativism or absolutism from an axiological point of view. The specific perspective of cultural studies will be used here which allowed the identification as to how cultural beliefs regulate economic practice. The changes in cultural beliefs will be presented with regard to re-definition of truth.
