## **Topic of lecture for the students**

---

The Future of the European Integration - Portuguese and Polish Perspective

## **Outline of lecture for the students**

---

I would like to run a workshop having discussions with students about our countries and economies, with the special focus on our experiences with European integration. I would like to present some basic facts on Polish economy and make some comparisons to Portugal. I would like to talk about possible advantages and costs of currency unions, as Portugal is a member of EMU. I would like to share and exchange our perspectives. I would create detailed teaching content right after receiving the approval of my application.
