9th most cited author in *Entrepreneurship Theory and Practice* (2013)

20th most cited author in *Journal of Business Research* (2020)

On-going research topic

Professor Dana has been researching for and with Indigenous peoples – those whose ancestors were living in an area prior to colonisation or within a nation-state prior to the formation of that nation-state. He defined Indigenous entrepreneurship as self-employment based on Indigenous knowledge and with a team developed a relevant model.
